This is not the _Vision_ you are looking for

Anoma Vision

Patrick - September 14, 2024 - HHH Q4

There are many ways to describe Anoma

An intent-centric architecture decentralized counterparty discovery, solving, information flow control, and atomic multi-chain settlement.

Anoma is a privacy-preserving, distributed, trust-aware operating system. Like a typical operating system, Anoma is a platform on top of which applications can run. It provides memory isolation, inter-application communication, and execution. Unlike a typical operating system, Anoma is built for multi-party intent-centric applications...

Anoma as a universal intent machine for Ethereum

These are not Visions...

Vision resonates with people. It also provides an accessible API for cult leaders and would be techno priests.

Vision can be simple like: building the future of France or bringing everyone in the world onchain or Programmable Crypto.

@apriori0x

Its not perfect and can lead to grift/larps/cringe. When the message is authentic however, it resonates. People like authentic.

The “Vision” was clearer before the greed and nihilism.
